SQL Data Analysis Internship - Assignment 4

Report 1: Average Grade by Sex

This report compares average grades for male and female students in all courses they are enrolled in. Helps to identify gender performance differences.

Report 2: Course pass rate

The pass mark was set at 40. The report shows the total students, students passed and pass percentage of each course.

Report 3: Overall Top 3 Students

This report displays the top three students based on their average grade across all courses in which they are enrolled.

Report 4: Students Taking More Than One Course

This report highlights students who are taking more than two courses and gives a view to participation across the curriculum.

5. Report on improvement

The current database has no semester or term information. Therefore, it is not possible to determine student growth from semester to semester. More semester-wise grade information would be needed.
